Turning ideas into smart, decentralized applications

PROJECTS

Evote – Blockchain-Based Voting System

Stack: Flutter, Dart, Firebase, Blockchain

- Designed and developed a secure, transparent, and tamper-proof voting platform for elections.
- Integrated Firebase authentication and blockchain ledger for immutable vote storage and verification.

Carrer Finder App

Stack: Flutter, Dart, Firebase

- Developed a cross-platform mobile application to help users explore career options based on their skills and interests.
- Implemented an interactive UI, integrated Firebase for authentication and data storage, and provided personalized career suggestions through structured questionnaires.

Focus Sprints – Productivity Chrome Extension

Stack: JavaScript, Chrome APIs, Chart.js, Local Storage

- Developed a focus timer with distraction site blocking, progress tracking, and daily/7-day analytics charts.
- Added psychological nudges, gamification with reward points, and automatic resets to boost user productivity.

Personal Portfolio Website

Stack: HTML, CSS, JavaScript, Bootstrap, GitHub Pages

- Designed and developed a responsive personal portfolio to showcase projects, skills, and achievements.
- Implemented smooth animations, project galleries, and contact integrations for professional outreach.
- Hosted on GitHub Pages for global accessibility.

EDUCATION

ZHCET, AMU, B. Tech. Computer Engineering | Aligarh, India

GPA: 8.1 / 10.0

2024-28

SKILLS

App Development (Flutter), Java, Firebase, MongoDB, Solidity, SQL, Git, REST APIs , ReactJS, NodeJS, JavaScript.

University Polytechnic, AMU, Diploma , Computer Engineering | Aligarh, India

GPA: 9.97 / 10.0

2021-24

SKILLS

UI/UX Design , Microprocessor, Git/GitHub, VS Code, Postman, C-language, HTML, CSS, Firebase.

VOLUNTEERING

Mentor/Speaker -Flutter Workshop, TPO Auditorium, ZHCET

2024, 2025

- Organised and led a **3-Day hands-on Flutter workshop** covering setup, widgets, layouts, routing and state management.
- Trained participants through interactive sessions, enabling them to build their first Flutter app from scratch.

- Worked as an **App Developer** for **Google Developer Groups on Campus (GDGC)**, **ZHCET**, a non-profit organization, contributing to community-driven projects and events.
- Served as a **Web Developer** for the **CodeChef Chapter**, building and maintaining web solutions to support coding competitions and community engagement.
- Participated in major hackathons including **Smart India Hackathon (SIH) 2024**, **AMU Hack 4.0**, and **Raptors Hackathon (July 2025)**, developing innovative solutions through teamwork, rapid prototyping, and problem-solving under tight deadlines.
